Title: Enhancement of Soft Skills in Especially Abled Children

Activity: Training Session

Number of Beneficiary: 22 STC students

Managers hire individuals for their teams based on their experience and how they present themselves during the interview process. They may strive to build a well-rounded team of people who will help their department and the entire company succeeds. Both hard and soft skills are important to consider when making hiring determinations and deciding who earns leadership roles and promotions. Soft skills are the skills you possess that go beyond your technical, measurable abilities. Soft skills focus more on your social, leadership, communication and problem-solving skills, among others. While hard skills are composed of the training and knowledge you've grown during the course of your career, soft skills are how you work with others and on your own. Although soft skills are more personality-based, you can still improve them. This programme was organized in collaboration with MoU Partner Sarthak Kadam Sansthan, Bhilai, Chhattisgarh.
